Course outline: In this ten week program year seven students will participate in a number of physical activities and sports that promote a healthy lifestyle, and develop fitness, co-operation and teamwork. Students will be introduced to the various motor skills required to perform at their age appropriate standard. The theoretical component will consist of the health related concepts of sun safe practices.

Assessment Information including differentiation: The course is catered to focus on learners' achievement, any individual needs and personal learning goals. Opportunities for differentiation within assessments are available to cater for individual special needs and also to develop specialised physical and practical skills. Completed units of work reflect individual skill acquisition. Assessment of student theory is observed through individual electronic research and the presentation of the topic in the designated format.

Week Due	Assessment Item
4	Introductory Assessment – Games and sport. Movement and skill acquisition. Participation, co-operation and teamwork.
5	Theory – Sun Safety Research and Assignment
8	Familiarisation Assessment – Games and sport. Movement and skill acquisition. Participation, co-operation and teamwork.
11	Consolidation Assessment - Games and sport. Movement and skill acquisition. Participation, co-operation and teamwork.

Homework Expectations:

- Homework is an expected component of this course. It is primarily research based to aid in the presentation of the topic in an electronic format. Time set aside for homework will facilitate learning in the classroom and allow the student to develop a deeper understanding of the topic.
